

FlexArm

FlexArm Die Grinding Unit with Optional Magnet

The FlexArm Die Grinding Unit is designed to hold the grinding motor perpendicular to the working surface. By using the FlexArm, companies can reduce operator fatigue, increase productivity and maintain consistency and accuracy with operations. The FlexArm Die Grinding Unit requires very little experience and maintenance and can be made portable with the use of the optional magnetic base mount. Call today for pricing and delivery. We are confident that our arms will save both time and money.

FLEXARM

THE DIE GRINDING SOLUTION

ACCURACY

The FlexArm is designed to hold the grinder perpendicular to the working surface. An optional piloted carbide deburring tool allows the precise removal of weld, ensuring successful die repair.

MOBILITY

By moving the FlexArm to the die, repairs can be done efficiently inside the press or at a repair station. Different mounts (Magnetic Base, Angle Mount, C-clamp Mount and Pedestal Mount) are available to customize the FlexArm to your specific needs.

DEPENDABILITY

The FlexArm is a precision unit that has been manufactured at our Ohio facility since 1984 and comes with a one year limited warranty.

SAVINGS

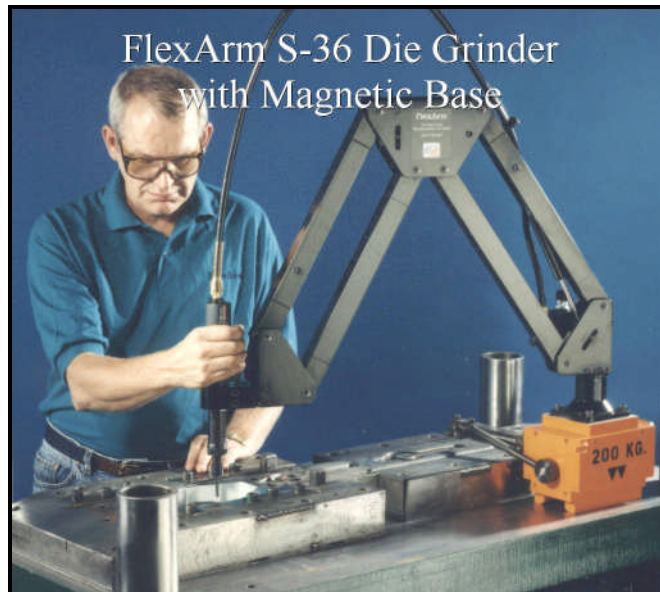

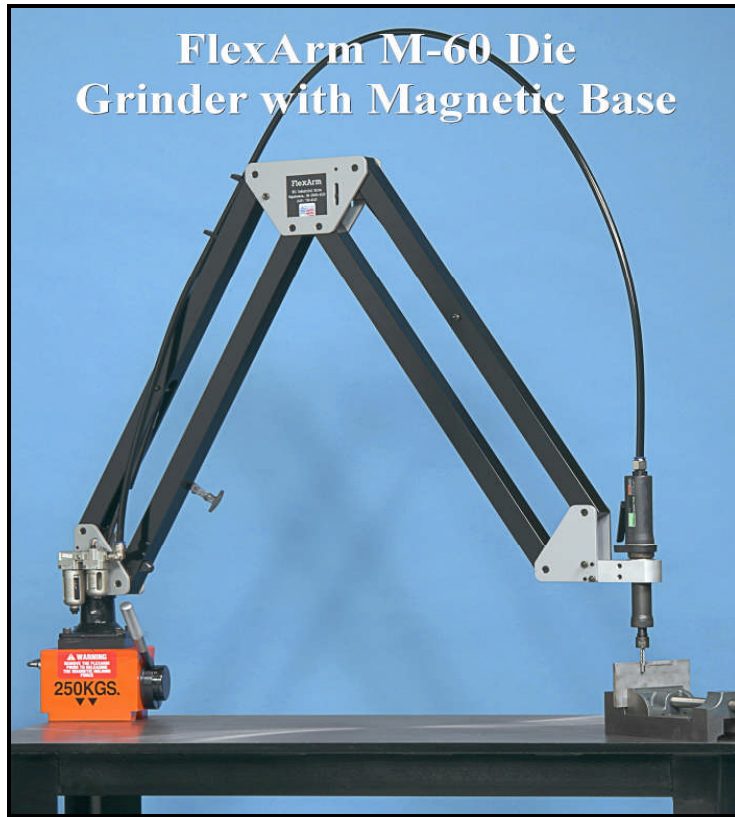

The FlexArm saves money by reducing die repair times, thus increasing machine output through greater machine utilization.

SERVICE

Our toll free number (800-837-2503) puts you in touch with an application specialist. Our extensive inventory allows accessories and repair parts to normally be shipped on the same day they are ordered.
